

## ABSTRACT

**Eka Puspa Sari, 2023, “Developing English Module for the Eight Grade Students for SMP Negeri 1 Bone-Bone”.** A thesis of English Educational Study Program, Tarbiyah and Teacher Training Faculty, State Islamic Palopo. Consultant (1) Prof. Sahraini and (2) St. Hartina.

This research aims to develop an appropriate English language module at SMP Negeri 1 Bone-Bone. The research questions are: (1) what English module is suitable for students at SMP Negeri 1 Bone-Bone? And (2) what are students' perceptions of the English module at SMP Negeri 1 Bone-Bone? the research design is research and development by applying the ADDIE model which consists of five steps, namely Analysis, Design, Development, Implementation and Evaluation. This research uses instruments: observation, questionnaire and interview for need analysis, an expert validation and a questionnaire for students and teacher perception. That designed module was tested on ten students of SMP Negeri 1 Bone-Bone. Therefore, the students' perception results obtained an average score of 3.64 which shows that the English module design is suitable for SMP Negeri 1 Bone-Bone. These results are supported by the results of the student questionnaire at SMP Negeri 1 Bone-Bone which are summarized as follows: the module consists of three themes, covering student needs, attractive design and layout, various integrated activities and skills, providing guidelines for use. With modules, students can learn independently, independently, because they are adaptive, and the instructions are easy.
